## EUROPA FASTENERS

We're a widely respected, innovative company that specializes in the design and manufacture of high-quality mechanical fastening systems.

For over 25 years, the largest companies in aeronautics, automotive manufacturing and other industries have placed their trust in us.

Our expertise and decades of experience have helped us build a wide-ranging product assortment of fastener parts and solutions that can be used in many different applications.

With our own in-house production and a network of experienced suppliers, we ensure decisive price and

Cutting-edge, CAD-supported development and design allow us to respond quickly to special customer requests. From prototypes to large-scale series production items, EUROPA FASTENERS never fails to provide the highest quality and outstanding reliability.

Our highest priority is to deliver on time and meet deadlines, and our new electronically-controlled high-bay ware-house and well-planned logistics allows us to consistently achieve these goals. Customers who have framework agreements with us can rely on just-in-time delivery for their orders.

## EUROPA FASTENERS

More than 30 years ago, we started building our product line with the BI-FIX quick-release fastener. Today, we manufacture numerous special fasteners as customized parts or subassemblies using a wide array of materials in mechanical processing or injection molding processes.

Our products are used for a broad range of applications in the aeronautics industry. For decades, we have been the leading supplier of inserts for light-weight paneling used in aeronautics, clip nuts for all types of assembly work, quick-release fasteners for secure assembly and fast disassembly for maintenance work, and many other specialized parts.

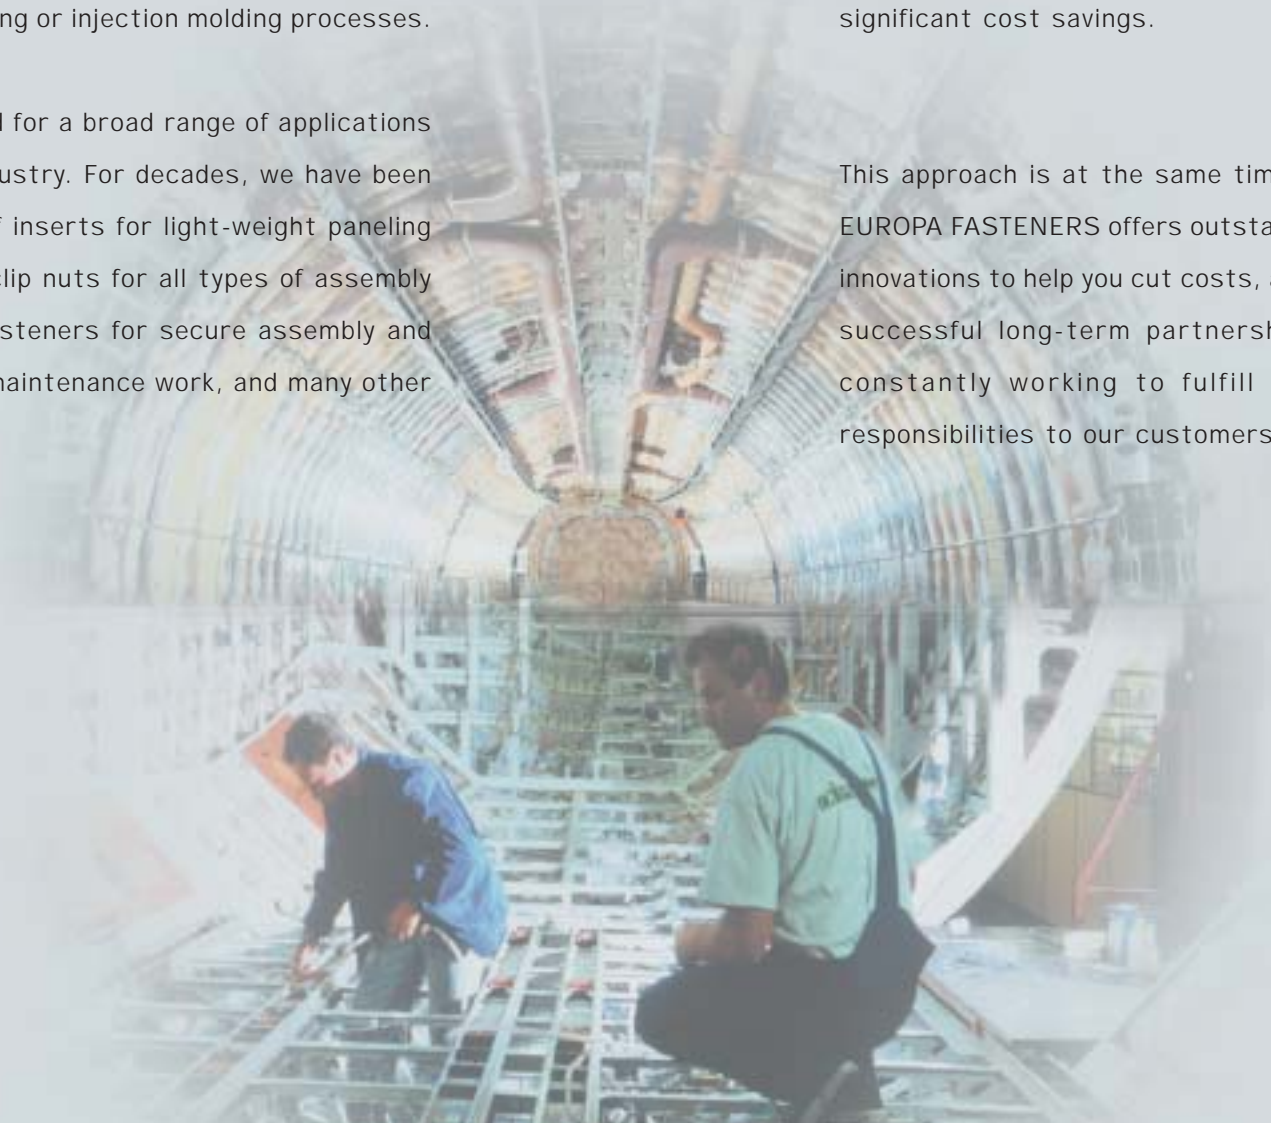

■

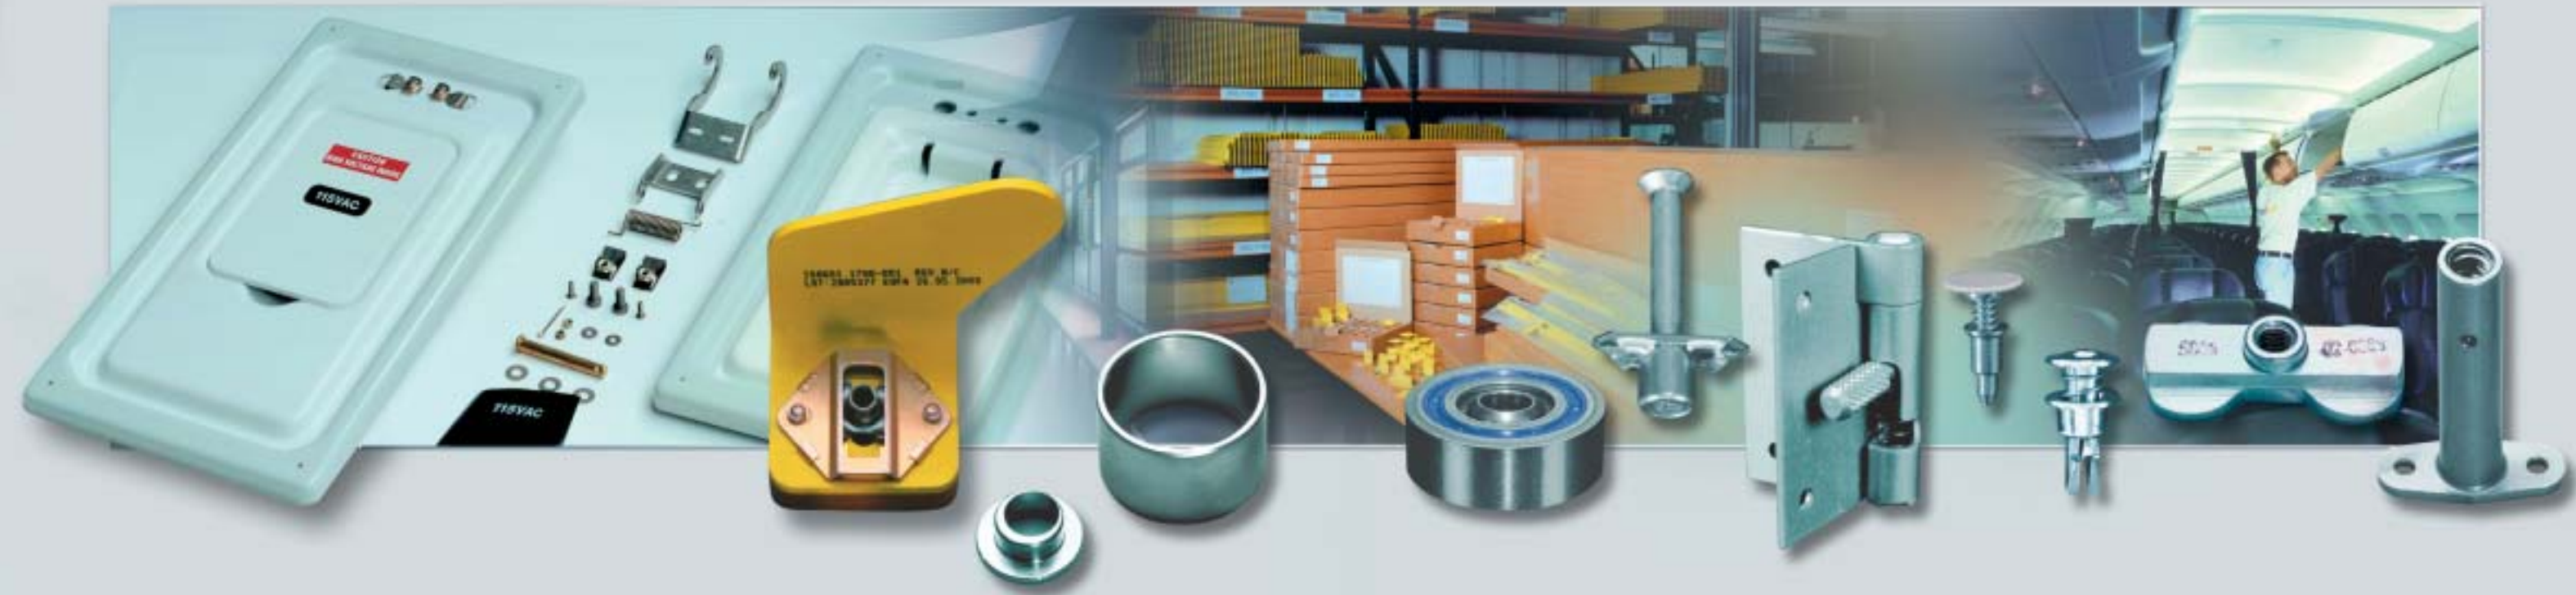

We're also setting new standards with our complete kits for interior fittings. Designed and manufactured to precise specifications to enable quick installation of interior panels, they allow our customers to achieve significant cost savings.

This approach is at the same time also our philosophy: EUROPA FASTENERS offers outstanding performance and innovations to help you cut costs, and in doing so creates successful long-term partnerships in which we are constantly working to fulfill our obligations and responsibilities to our customers.

■

## Your supplier for complex requirements

■

## EUROPA FASTENERS

To some, we're a reliable manufacturer and supplier of high-quality mechanical fasteners. To others, we're an innovative partner for customized fastening solutions and components.

To everyone, however, the same principle applies: We don't seek problems, we seek solutions – and then pass them on to our customers.

New types of aircraft demand new solutions that are lighter but even more stable. Developing sound-dampening connectors for quieter cabins, for example, is just one of the current challenges at hand – and a challenge that we are successfully mastering.

Our comprehensive product lines and in-depth expertise reflect our innovative strength from which our customers will always benefit.

For everything from analysis and development to prototyping and large-scale production, EUROPA FASTENERS is your partner for complete fastening solutions. Our expertise, creative designs and advanced materials, combined with our enthusiasm and dedication to our customers, ensure the smooth, trouble-free and safe operation of everything we produce.
